

SENIOR CONSULTANT IN FORMAL MODELLING

Sofismo specializes in the innovative use of formal modelling. Customers rely on our fairness and our daring to innovate, employees rely on our mutual respect and our love of continuous education.

You analyse the data and knowledge situation of our customers and design modelling languages to represent it. With your advice you lay the foundation for generative implementation of products and solutions. As a seasoned consultant you are the technical leader of highly skilled professionals.

Technical skill set:

- Outstanding ability to identify relevant abstractions
- Broad experience in architectures, platforms, modelling languages and tools
- Strong track record in agile, iterative development methodologies
- Successful introduction of model-driven and generative approaches in large projects
- Experience in product-line engineering is a plus
- Broad experience with respect to industries and types of systems

Social skills:

- Creative, communicative and dynamic
- Willing to learn and team oriented
- Optimistic and purposeful
- Persevering and practical
- Friendly and unpretentious in social interactions

You are fascinated with modelling!
